

Manufacturer of Ultrasonic Cylinder Test Equipment and Modal Acoustic Emission Service Provider

FOR IMMEDIATE RELEASE

(Centennial, CO, USA. January 2010) - DIGITAL WAVE CORPORATION ANNOUNCES INSTALLATION OF UE1™ ULTRASONIC EXAMINATION CYLINDER SCANNING SYSTEM AT PURITY CYLINDER GASES FACILITY.

Digital Wave Corporation (www.digitalwavecorp.com) announced today that they delivered and installed a new UE1™ DOT cylinder inspection machine to the Purity Cylinder Gases facility in Grand Rapids, MI. This UE machine uses immersion technology to ultrasonically inspect high-pressure gas cylinders to DOT specs. Components include pneumatic tilt table, recyclable water bath tank, drive collar for positively clamping cylinder, and X-Y-Z-H-R scanning bridge for positioning ultrasonic scanning sensor along cylinder wall. Non-contact nature (single transducer design) facilitates calibration time and promotes calibrated performance duration.

Digital Wave Corporation is a privately held manufacturer of ultrasonic examination (UE) cylinder testing equipment, modal acoustic emission (AE) testing equipment and a provider of associated inspection services. With applications worldwide, Digital Wave and its partners serve private and governmental clients in the compressed gas, pressure vessel and cylinder industries. The firm's PhD's, engineers, software programmers, field techs and manufacturing staff are ranked with the best in the industry. For more information on our cutting edge technologies, please feel free to contact us at any time.
